1. Executive Summary

A simple, business-owner-friendly overview of the proposed AI employee system.

Revora AI Front Desk Team is a controlled AI employee system designed to help local businesses capture more leads, respond faster, prepare bookings and follow-ups, flag missed revenue opportunities, and support consistent marketing content creation. It is not positioned as a loose chatbot. It is a structured business workflow system with approval rules and clear human oversight.

Core promise

A 24/7 AI employee team that helps the business stop losing opportunities from missed calls, slow responses, unbooked leads, inconsistent follow-up, and inconsistent marketing.

2. Client Information

Fill this section before sending or presenting the proposal.

Business name	[Client Business Name]
Contact person	[Client Name / Title]
Website	[Client Website]
Main phone	[Client Phone]
Main email	[Client Email]
Prepared by	Mercy Speaks Digital
Proposal date	[Date]

3. Problems Identified

Use this section to summarize what the business is likely losing or struggling with.

- ☐ Missed calls or after-hours inquiries that do not receive a fast response.
- ☐ Slow follow-up that allows leads to contact competitors first.
- ☐ Unbooked leads caused by manual scheduling friction.
- ☐ No clear visibility into missed revenue opportunities.
- ☐ Inconsistent marketing and social media content creation.
- ☐ Manual admin work that pulls staff away from higher-value service.

4. Recommended AI Employee Team

The proposed system uses specialized AI employees with clear roles and human approval rules.

AI Employee	Role in the Business
Intake Agent	Captures name, phone, email, service need, message, and lead source.
Lead Qualifier Agent	Scores fit, urgency, service category, and next recommended action.
Booking Agent	Prepares booking intent, captures preferred time, and guides leads toward appointment scheduling.
Follow-Up Agent	Drafts professional follow-up messages for leads, missed calls, and no-response situations.
Human Handoff Agent	Flags urgent, angry, complex, or human-request situations for owner/team review.
Missed Revenue Tracker	Logs opportunities that may have been lost due to missed calls, no follow-up, or failed handoff.
Marketing/Social AI Assistant	Prepares content ideas, weekly plans, captions, short-form scripts, and approval-ready drafts.

5. Scope of Work

Recommended setup and delivery scope for the client engagement.

Phase	Work Included	Outcome
Discovery & Setup	Collect business details, services, FAQs, hours, booking rules, and escalation rules.	Clear configuration plan.
AI Employee Configuration	Set up intake, qualification, booking, follow-up, handoff, and marketing draft workflows.	Client-specific AI employee behavior.
Testing	Run test leads, booking requests, follow-ups, handoffs, and missed revenue scenarios.	Safe, reviewed workflow before launch.
Launch Support	Guide client through use, alerts, approvals, and simple dashboard review.	Operational readiness.
Optimization	Review outcomes, adjust prompts,	Better performance over time.

Phase	Work Included	Outcome
	improve follow-up and content strategy.	

6. Package Options

Choose a package based on how much automation and support the client needs.

Package	Best For	Includes	Suggested Investment
Starter	Small businesses needing lead capture and follow-up drafts.	Intake Agent, Lead Qualifier Agent, Follow-Up drafts, owner alerts, basic reporting.	\$497 setup + \$197/month
Pro	Businesses needing booking support and missed opportunity visibility.	Everything in Starter, Booking Agent, Human Handoff, missed revenue tracking, enhanced workflow review.	\$997 setup + \$397/month
Premium	Businesses wanting a broader AI employee team plus marketing support.	Everything in Pro, Marketing/Social AI Assistant, weekly content calendar, social drafts, approval workflow, optimization support.	\$1,500-\$2,500 setup + \$597-\$997/month

Pricing note

Pricing can be adjusted based on niche, call volume, integrations, support level, and whether the client needs voice, SMS, email, or social media workflows.

7. Estimated Timeline

A practical launch timeline for a pilot or client setup.

Stage	Estimated Time	What Happens
Discovery & Setup Form	1-2 days	Client completes setup form and provides FAQs, booking link, contacts, and approval rules.
Configuration	3-5 days	AI employee workflows are

Stage	Estimated Time	What Happens
		configured and reviewed.
Testing	1-3 days	Test lead intake, qualification, follow-up, booking intent, and handoff scenarios.
Review & Adjustments	1-2 days	Client reviews tone, scripts, routing, and approvals.
Launch	After approval	Activate selected workflows with human oversight.

8. Client Responsibilities

The client provides the business knowledge needed to make the AI system accurate and safe.

- ☐ Complete the Client Setup Form.
- ☐ Provide business FAQs, services, pricing rules, and business hours.
- ☐ Provide booking link and scheduling rules.
- ☐ Approve AI receptionist tone and escalation rules.
- ☐ Review test workflows before launch.
- ☐ Identify the owner/team members who receive alerts and approvals.

9. Approval and Safety Rules

Sensitive actions should require human approval unless the client explicitly approves automation.

Human approval by design

The AI system can prepare emails, SMS, booking confirmations, social posts, and alerts. Sensitive actions should remain draft-only until an approved team member reviews them.

- ☐ Email follow-ups require approval unless explicitly enabled.
- ☐ SMS follow-ups require approval unless explicitly enabled.
- ☐ Booking confirmations require client-approved rules.
- ☐ Pricing, discounts, complaints, and sensitive situations require human review.
- ☐ Social posts remain drafts until approved for publishing.
