

CLIENT ONBOARDING WORKBOOK

Revora AI Front Desk Team

Powered by Mercy Speaks Digital

A premium setup workbook for configuring your AI employee team.

Lead capture, qualification, booking support, follow-up, handoff, missed revenue tracking, and marketing content support - organized for a smooth launch.

Client business	_____
Prepared for	_____

Date	_____
Version	Client Onboarding Workbook v1.0

How to use this workbook

Complete each section before launch. Items marked with [] can be checked off during setup. Anything involving customer communication, booking confirmation, or publishing should remain approval-based until final testing is complete.

Welcome

This workbook captures everything needed to configure a safe, professional AI employee system for your business.

Revora AI Front Desk Team is designed to help local businesses respond faster, capture more leads, organize follow-up, prepare booking actions, flag missed revenue opportunities, and support consistent marketing content. This workbook makes sure the AI system understands your business before it is launched.

Important safety note

This onboarding document is client-facing. It intentionally does not include internal development notes, database blockers, API keys, or implementation details. Sensitive actions such as sending emails, SMS, booking confirmations, and social posts should require human approval until your launch configuration is tested and approved.

Launch readiness at a glance

- | | |
|---|---|
| ☐ Business profile completed | ☐ Services and FAQs approved |
| ☐ Booking and escalation rules confirmed | ☐ Follow-up and approval rules confirmed |
| ☐ Missed revenue settings configured | ☐ Marketing preferences collected |
| ☐ Test calls/chats completed | ☐ Client sign-off received |

1. Business Information

Collect the foundation details that identify the business, service area, and primary goals.

Basic business details

Business name	_____
Legal business name	_____
Industry / niche	_____
Website URL	_____
Main phone number	_____
Main email address	_____
Business address	_____
Service area	_____
Time zone	_____
Primary contact person	_____
Primary contact role/title	_____

Business goals

Main problem to solve	_____
What is lost most often?	Missed calls / slow follow-up / unbooked leads / inconsistent marketing / other
30-day success goal	_____
90-day success goal	_____

2. Services Offered

List the services the AI team must understand, qualify, and route correctly.

Service	Description	Starting price/rule	Avg value	Booking?	Urgent?

Priority services

Top service to promote	
Most profitable service	
Most urgent service	
Most common request	

Pricing rule

Decide whether the AI may mention exact prices, quote ranges, or avoid pricing and send the lead to a human.

3. Business Hours

Define open hours, after-hours behavior, holiday rules, and emergency routing.

Day	Open	Close	Notes
Monday			
Tuesday			
Wednesday			
Thursday			
Friday			
Saturday			
Sunday			

Special rules

After-hours behavior	
Holiday behavior	
Emergency call handling	
When to transfer to human	
When to capture message only	

4. Booking Link and Scheduling Rules

Configure how the AI should prepare appointments and route booking requests.

Booking platform	Cal.com / Calendly / Google Calendar / Manual / Other
Booking URL	
Appointment types	
Default appointment length	
Buffer time required	
Can AI send booking link?	Yes / No / Only after collecting details

Minimum information before booking

[] Full name

[] Phone number

- ☐ Email
- ☐ Preferred date/time
- ☐ Urgency level
- ☐ Service needed
- ☐ Notes/details

Should AI confirm details first?	
Should urgent bookings go to human first?	

5. Owner / Team Contact Info

Identify who receives alerts, approvals, escalation notices, and summaries.

Role	Name	Phone	Email	Best time
Owner				
Manager				
Front desk				
Sales contact				
Emergency contact				

Notification preferences

- ☐ Email alerts
- ☐ Google Sheet/CRM logging
- ☐ Daily summary
- ☐ Missed revenue alerts
- ☐ SMS alerts
- ☐ Dashboard only
- ☐ Urgent handoff alerts

6. Escalation Rules

Define when the AI must bring in a real person.

Human handoff triggers

- ☐ Customer asks for owner, manager, or human
- ☐ Emergency or urgent issue
- ☐ Pricing negotiation
- ☐ Complex request outside AI knowledge base
- ☐ Customer is angry or upset
- ☐ Legal, medical, or financial risk
- ☐ Cancellation or complaint

Transfer phone number	
Backup callback number	
Escalation email	
Low urgency definition	
Medium urgency definition	
High urgency definition	
Critical urgency definition	

Message before transfer	
If transfer fails	

7. FAQs

Provide approved answers for the questions customers ask most.

FAQ topic	Approved answer	Human review needed?
Services offered		
Pricing policy		
Business hours		
Location/service area		
Booking process		
Cancellation policy		
Payment methods		
Emergency support		
Preparation / what to bring		
Warranty / guarantee policy		

FAQ safety rules

What should AI never say?	_____
Topics requiring human review	_____
Answers that must be exact	_____
Answers that can be general	_____

8. AI Receptionist Tone

Set the preferred voice, personality, and greeting style.

Preferred tone

- ☐ Warm and professional
- ☐ Premium and polished
- ☐ Direct and efficient
- ☐ Other
- ☐ Friendly and conversational
- ☐ Calm and reassuring
- ☐ Faith-friendly where appropriate

Approved greeting	Thank you for calling [Business Name]. This is the AI assistant. How can I help you today?
-------------------	--

Formal or casual?	
Should AI mention it is AI?	
Words/phrases to use	
Words/phrases to avoid	

9. Follow-Up Rules

Define how the AI should prepare or send follow-up messages after a lead interaction.

☐ Email follow-up allowed

☐ SMS follow-up allowed

☐ Phone callback allowed

☐ Manual review required before sending

Follow-up stage	Timing	Approval required?	Notes
First follow-up			
Second follow-up			
Final follow-up			
Stop follow-up rule			

Templates needed

☐ New lead response

☐ Missed call response

☐ Booking reminder

☐ No-response follow-up

☐ Post-consultation follow-up

☐ Re-engagement message

10. Missed Revenue Settings

Estimate and track opportunities that may have been lost because of missed calls, delayed follow-up, or failed handoffs.

Average customer value	_____
Average appointment value	_____
Highest-value service	_____
Estimated value of missed call	_____
Estimated value of missed booking	_____
Estimated value of abandoned chat	_____

Events to track

☐ Missed call

☐ Failed handoff

☐ No follow-up

☐ Booking not completed

☐ No-show

☐ Abandoned form/chat

☐ Other

Recovery message approval	
Follow-up timing for missed opportunities	
Who receives high-value alerts?	

11. Marketing / Social Media Preferences

Collect the brand voice and content preferences needed for the marketing AI employee.

Brand voice	_____
Target audience	_____
Main offer	_____
Main pain points	_____
Main CTA	_____

Preferred platforms

- | | |
|---|---|
| ☐ Facebook | ☐ Instagram |
| ☐ TikTok | ☐ YouTube Shorts |
| ☐ LinkedIn | ☐ Blog |
| ☐ Email newsletter | |

Content types wanted

- | | |
|--|--|
| ☐ Educational posts | ☐ Short-form videos |
| ☐ Testimonials/case studies | ☐ FAQs |
| ☐ Behind-the-scenes | ☐ Offers/promotions |
| ☐ Founder/owner story | |

Topics to avoid	_____
Claims to avoid	_____
Compliance-sensitive topics	_____
Posting frequency	_____
Preferred hashtags/keywords	_____

12. Approval Rules

Decide which actions the AI can draft and which require a human decision.

Actions that require approval

- | | |
|--|--|
| ☐ Sending emails | ☐ Sending SMS |
| ☐ Confirming appointments | ☐ Publishing social posts |

- ☐ Giving price quotes
- ☐ Escalating complaints externally
- ☐ Making promises on behalf of the business
- ☐ Offering discounts
- ☐ Changing customer records

Approver role	Name	Channel	Deadline / SLA
Primary approver			
Backup approver			
Urgent approver			

Approval statuses

- ☐ Draft
- ☐ Pending approval
- ☐ Approved
- ☐ Rejected
- ☐ Needs revision
- ☐ Sent/published

13. Launch Checklist

Confirm all configuration and client approvals are complete before go-live.

Before launch

- | | |
|---|--|
| ☐ Business information collected | ☐ Services added |
| ☐ FAQs approved | ☐ Business hours confirmed |
| ☐ Booking link tested | ☐ Owner/team contacts confirmed |
| ☐ Escalation rules approved | ☐ Follow-up rules approved |
| ☐ Missed revenue values configured | ☐ Marketing preferences collected |
| ☐ Approval rules confirmed | ☐ AI greeting approved |
| ☐ Test lead submitted | ☐ Test call/chat completed |
| ☐ Dashboard reviewed | ☐ Owner trained on alerts and approvals |

Technical checklist

- | | |
|---|--|
| ☐ Environment variables configured | ☐ API keys secured |
| ☐ Database tables verified | ☐ Agent runs logging correctly |
| ☐ Tool calls logging correctly | ☐ Email/SMS disabled until approved |
| ☐ Demo routes not exposed publicly unless intended | ☐ Production build passes |
| ☐ Rollback plan available | |

14. Testing Checklist

Run these tests before activating production workflows.

Test category	Test cases
Lead handling	Full lead, missing phone, missing email, urgent lead, cold lead, spam lead
Booking	Book request, preferred time, availability question, reschedule, cancel
Handoff	Ask for owner, ask for manager, angry customer, emergency request, transfer failure
Follow-up	First response, no-response follow-up, missed call recovery, post-consultation follow-up
Missed revenue	Missed call, failed handoff, no follow-up, estimated value, recovery status
Marketing	Weekly strategy, 7-day content calendar, post draft, video script, visual prompt, approval gate

Go-live rule

Do not activate live email, SMS, booking confirmations, or social publishing until the client has approved the configuration and the system has passed real-write smoke testing.

Final Client Readiness Decision

Complete this section only after the onboarding workbook and testing checklist are finished.

- ☐ Client understands what the AI can and cannot do
- ☐ Human approval rules confirmed
- ☐ Database workflow has passed real-write smoke testing
- ☐ Alerts and approvals tested
- ☐ AI has approved business knowledge
- ☐ Client has reviewed launch configuration

Go-live approved by	
Client name	
Business name	
Date	
Notes	

Professional deployment note

This workbook should be completed before a live client launch. For pilots, clearly label what is in demo mode, what requires approval, and what is ready for production activation.
