

REVORA AI FRONT DESK TEAM

10-Minute Demo Script

Powered by Mercy Speaks Digital

Purpose

Use this script to present the Mercy AI Staff / Revora AI Front Desk Team system to a local business owner in a clear, confident, and professional way.

Core pitch

A 24/7 AI employee team that captures leads, qualifies them, prepares booking and follow-up, flags missed revenue, and helps create marketing content.

Audience	Length	Goal
Local service business owners	10 minutes	Book a customization call

10-Minute Run of Show

Use this page as your timer while presenting the demo.

Time	What to Say / Show
0:00-1:00	Opening: introduce Revora AI Front Desk Team and the business problem.
1:00-2:00	Problem setup: missed calls, slow follow-up, unbooked leads, and inconsistent marketing.
2:00-3:00	Sales page: show /ai-employee-system and explain the promise.
3:00-4:30	Demo Hub + Command Center: show how the system is organized.
4:30-6:00	AI Employees: explain each agent role in plain language.
6:00-7:00	Lead Ops: show how a new lead becomes a qualified opportunity.
7:00-8:00	Missed Revenue + Approvals: show business control and safety.
8:00-9:00	Marketing/Social AI: show content support and growth workflow.
9:00-10:00	Close: ask the discovery question and invite them to customize the system.

Opening Line

Start strong and keep it business-owner friendly.

Say this

Hi [Name], thanks for taking a few minutes with me. I want to show you Revora AI Front Desk Team, powered by Mercy Speaks Digital. It is a 24/7 AI employee system designed to help local businesses capture more leads, respond faster, prepare bookings and follow-ups, flag missed revenue, and support marketing content - without replacing human judgment.

- Keep the opening short. You are not teaching AI; you are showing a business solution.
- Use the client's business name during the demo whenever possible.
- Avoid technical terms unless the prospect asks.

Problem Setup

Make the pain obvious before showing the solution.

Say this

Most businesses do not lose leads because they are bad businesses. They lose leads because calls are missed, follow-up is slow, appointments are not booked fast enough, and nobody is tracking the revenue that slipped through the cracks. This system is built to make those missed opportunities visible and help the business respond faster.

Business problem	How Revora helps
Missed calls	AI captures the opportunity instead of letting it disappear.
Slow follow-up	AI prepares the next message quickly for review or sending.
Unbooked leads	AI prepares booking intent and guides the customer toward the next step.
No visibility	Missed revenue signals are tracked instead of hidden.
Inconsistent content	Marketing/Social AI prepares content ideas, scripts, and drafts.

Page-by-Page Talking Points

Follow this order for a clean, confident demo.

/ai-employee-system

Start here. Explain the product in business language: a 24/7 AI employee team for leads, bookings, follow-up, missed revenue, and marketing.

/demo

Use the hub to show that the system is organized and easy to navigate. This makes the demo feel intentional and professional.

/demo/command-center

Show the whole operating system view: lead activity, AI runs, follow-ups, approvals, and missed revenue signals.

/demo/ai-employees

Explain each AI employee by role. Keep it simple: each one has one job and hands off to the next when needed.

/demo/lead-ops

Show how a lead is captured, qualified, and prepared for booking or follow-up.

/demo/missed-revenue

Explain how missed calls and slow response become visible revenue opportunities instead of invisible losses.

/demo/approvals

Show that sensitive actions can require human review before anything is sent or published.

[/demo/marketing-social](#)

Show the marketing employee system: weekly strategy, content calendar, scripts, drafts, and performance ideas.

What to Say on Each Page

1. Public Sales Page - /ai-employee-system

- This is the public explanation of the offer.
- Point out that the system is a team of AI employees, not just one chatbot.
- Emphasize that it supports leads, bookings, follow-up, missed revenue, and marketing.

2. Demo Hub - /demo

- This is the demo navigation center.
- Use it to keep the presentation organized.
- Tell the prospect this is the controlled demo environment before client-specific setup.

3. Command Center - /demo/command-center

- This is the big-picture operating view.
- Explain that a business owner can see activity, AI runs, follow-ups, approvals, and missed revenue signals in one place.
- Keep the explanation outcome-focused: more visibility and faster response.

4. AI Employees - /demo/ai-employees

- Show each AI employee as a role: intake, qualification, booking, follow-up, handoff, marketing.
- Explain that each employee has a controlled responsibility.
- Use the phrase: "The AI prepares work, but sensitive actions can require human approval."

5. Lead Ops - /demo/lead-ops

- Show how a new lead moves through the system.
- Explain intake, qualification, next action, and owner visibility.
- Say: "This is how your business stops letting good leads sit unanswered."

6. Missed Revenue - /demo/missed-revenue

- Show that the system can help estimate the value of missed opportunities.
- Explain that missed calls and failed handoffs become trackable events.
- Say: "If you cannot see the leakage, you cannot recover it."

7. Approvals - /demo/approvals

- Show the safety layer.
- Explain that emails, SMS, booking confirmations, pricing, and social posts can require approval.
- Make clear that this protects the client and keeps the AI controlled.

8. Marketing/Social AI - /demo/marketing-social

- Show weekly strategy, content calendar, scripts, post drafts, and suggested next actions.
- Explain that the system helps businesses stay consistent with content.
- Say: "This helps the business follow up with leads and stay visible online."

Safety Explanation

Use this to build trust and reduce fear of AI.

Say this

The goal is not to let AI run your business without supervision. The system can prepare work, capture details, draft follow-ups, flag urgent issues, and organize next steps. For sensitive actions - like sending messages, confirming appointments, publishing posts, or discussing pricing - we can require human approval first.

Action type	Recommended handling
Safe to automate first	Lead capture, intake summaries, task drafts, content ideas, internal notifications.
Require approval	Emails, SMS, booking confirmations, social posts, pricing, discounts, complaints.
Escalate to human	Angry customers, emergencies, legal/medical/financial risk, complex requests.

Closing Pitch

Say this

Based on what you have seen, the next step would be to customize this AI employee system around your business: your services, hours, booking rules, FAQs, follow-up process, and approval rules. Would you like me to customize this AI employee system for your business?

Follow-Up Question

Ask this

What is the biggest thing your business loses right now - calls, appointments, follow-up, or marketing consistency?

Discovery Notes During the Demo

Capture answers while the prospect is engaged.

Business name	
Main pain point	
Missed calls per week	
Average customer value	
Current booking method	
Current follow-up process	
Who approves customer messages?	
Interest level	Cold / Warm / Hot
Next step agreed	

Demo Prep Checklist

- [] Local app is running and demo hub opens correctly.
- [] Open tabs before the call: /ai-employee-system, /demo, /demo/command-center, /demo/ai-employees, /demo/lead-ops, /demo/missed-revenue, /demo/approvals, /demo/marketing-social.
- [] Have the One Page Offer Sheet ready to send after the demo.
- [] Have the Client Setup Form ready if the prospect is interested.
- [] Do not show internal blocker notes, terminal logs, Supabase screens, or raw development details.
- [] Keep the promise honest: working demo/prototype now, production setup after onboarding and final deployment configuration.

Final Reminder

Keep the demo simple

You are not selling “AI technology.” You are selling speed, response, visibility, follow-up, and growth. Show the business owner how the system helps them stop losing opportunities and stay organized.

Best Closing Line

Say this

If we customized this around your business, the system could help capture your leads, organize your follow-up, flag missed revenue, and support your marketing. Would you like to start with the setup form so I can map this to your business?
